In view of the remarks filed on November 01, 2005, the art rejection is withdrawn.

The pending claims however, continue to be unpatentable as following:

Election/Restrictions

1. Claims 7-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected a method of making a tape substrate, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on November 1, 2005 is acknowledged.

Claims 7-12 may be allowable, if all the process claims are commensurate in scope with the allowable product claims, based on *In Re Ochai*, 37 USPQ 2d 1127 (1995) and *In re Brouwer*, 37 USPQ 2d 1663 (1995).

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figs. 1 & 3 need to be drawn larger for clarity. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is vague and indefinite, as it is unclear how "pore density" in any way relates to "surface area"? Clarification is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 5-6 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hisanori et al (JP 2002-289653).

Hisanori discloses a tape carrier comprised of a substrate (1), a copper foil wiring pattern (3), a noble metal plated layer (10), a pure tin layer (4) and a tin-copper alloy layer (5); all in the named order.

The noble metal plated layer (10) is a noble metal such as silver, gold or palladium, etc. is formed onto the copper foil wiring pattern (3), it has a thickness of 0.01-0.1 μm [¶ 0019 & ¶ 0023].

A pure tin layer (4) of about 0.5 μm and a tin-copper alloy layer (5) in the thickness of about 0.15-0.2 μm , are respectively formed over the noble metal plated layer (10) [¶ 0027].

The prior art mentions about "pinholes" in the noble-metal plating layer [¶ 0023]. The examiner is taking the position that "pinholes" is the same as the pores in the layer, thus the noble metal plating layer includes pores.

Allowable Subject Matter

6. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if incorporate into claims 1 and 13.
